Now that the weather is getting warmer, we will all be spending more time outside. It's a great time to remember why we all need to wear sunscreen every day, regardless of our skin tone. Here are some reasons to wear sunscreen daily:

1. It protects your skin from UV Rays, thus reducing your chance of getting sunburn.
2. It lowers your skin cancer risk.
3. It prevents premature aging
4. It helps maintain an even skin tone.
