H. Adv. Newspaper 1-6 Syllabus

Instructor: Shelby Schmidt
E-mail: shelby.schmidt@ops.org
Office Phone: 531-299-7131
Number: A7
Plan: Room 330
Best times to contact: Any time via email

Course Description
H. Adv. Newspaper 1-6 serves as advancement option upon completing and passing Journalism 1-2 or the combination of Photojournalism 1 and Digital Journalism 1, providing an opportunity to create print digital content that matches professional journalism standards. During this course, students will apply the fundamentals of print journalism, including media law, writing various forms of journalistic styles and designing or taking photographs, while examining current events in order to refine critical thinking skills. Students will create, produce, and have final say in all content for the North Star newspaper.

Instructional Philosophy
Student journalists play a vital role in the school. They tell the stories that need to be heard, giving a voice to the school. I whole-heartedly believe in what student journalists do and in giving them the opportunity to exercise their voices. I take this seriously and will provide a curriculum that will support you in this mission. You will be assigned mostly projects that require school equipment and software, and be prepared to be challenged while having some fun along the way. Keep in mind: journalism isn’t just about writing, especially the digital journalism you will be creating this year. Sure, writing can a big part, but you must also be willing to invest in teamwork, truth-seeking, becoming a better citizen and encouraging others to do the same. My hope is that students leave 330 impassioned and confident in their ability to do just this while creating projects of which they are proud and are journalistically sound. This content will then be distributed to audiences.

Content Standards
1.) Writing
2.) Technology and Design
3.) Law and Ethics
4.) Media Analysis
5.) Collaboration and Leadership

Major Units of Study
1. News gathering
   Observation and story development
   Interviewing
   Enterprise/investigative journalism
2.) Online reporting
   Resources for online infographics
3.) Print storytelling
   Feature, news, sports and opinion writing
Multimodal news packaging

4.) Print Production
   Adobe Suite software
   Online design resources
   Photojournalism skills

5.) Marketing
   Advertisement sales
   Newspaper distribution
Course Expectations
- Complete monthly beat reports. Beat reports are intended to promote professionalism and to help develop real reporting skills. Deadlines for this to come.
- Under the Collaboration and Leadership standard, students understand that they will be required to work in teams that change throughout the year. Expect groups to be determined by both students and teacher throughout the year.
- Refine writing skills through workshops focused on grammar and Associated Press (AP) style.
- Remain up-to-date on current events (both in the school community and beyond)
- Apply journalism fundamentals in order to produce content that will be featured in the school newspaper and school broadcast programs
- Demonstrate knowledge of news values, journalism law and ethics.
- Produce and identify different story types and forms.
- Identify characteristics of quality photography and graphic design.
- Keep a portfolio of major stories and projects completed throughout the year.

Class Rules and Expectations
Class Rules: To be a Viking is to be Respectful, Responsible and Accountable. In room 330, that means:

Be Respectful
- to yourself and all others, both students and adults, by allowing all persons to maintain their dignity, unconditionally.
- The language you use should reflect your understanding that this is a classroom in which everyone is welcome and respected, regardless of difference or ability
- Respect yourself by embracing the privilege of distraction free learning:
  ▪ Turn your electronic devices OFF and keep them out of sight unless for journalistic reasons defined by your teacher. If you find yourself unable to meet this expectation, please allow your instructor to keep watch over your device until the end of the period.
- Listen to your classmates and be respectful of their lived experiences
- Respect others by wearing your mask in a way that covers your mouth and nose

Be Responsible
- Be on time in your assigned seat doing bell work when the bell rings
- Use class time wisely
- Be a positive and respectful advocate for the needs of yourself and others.
- Help promote a positive learning environment
- Throw away any trash in the trash can at the front of the room
- Keep lids on drinks
- Keep drinks away from the computers

Be Accountable
- Be an active participant in your education:
  ▪ Have materials ready
  ▪ Complete assignments on time
  ▪ Participate in activities and discussions respectfully
  ▪ Raise your hand to ask or answer questions
  ▪ Try something NEW

Required Materials EVERY DAY
- Technological device that can access TEAMS
- Some way to take notes
- Materials necessary for your current project
Assessment
The particular assignments are broken down in your syllabus as a glance, which is also posted in our TEAMS page.

**Formative:**
- Deadlines for production cycles of **major project** and **monthly beats**
- Biweekly evals: **double formative** – graded individually and averaged together 3 times throughout the semester
- Weekly current events analysis or bell work assignments on different skills

**Summative:**
- Major project Eval: to be completed after each major project (1 per quarter)
- Major Project – 1 per quarter; double summative
- Monthly stories final product
- Final Reflection – last day of the semester

**OPS Secondary Grading Practices**
All coursework and assessments are judged based on the level of student learning from “below basic” to “advanced.” This course will provide multiple opportunities to achieve at the “proficient” to “advanced” levels. Students are evaluated based on a proficiency scale or project rubric. Proficiency scales for this course are available upon request (teacher will identify location such as portal, teacher website, attached, etc.)

There are three types of coursework*
- **Practice** – assignments are brief and done at the beginning of learning to gain initial content (e.g., student responses on white boards, a valid sampling of math problems, keyboarding exercises, and diagramming sentences, checking and recording resting heart rate). Practice assignments are not generally graded for accuracy (descriptive feedback will be provided in class) and are not a part of the grade. Teachers may keep track of practice work to check for completion and students could also track their practice work. Practice work is at the student’s instructional level and may only include Basic (2) level questions.

- **Formative (35% of the final grade)** – assessments/assignments occur during learning to inform and improve instruction. They are minor assignments (e.g., a three paragraph essay, written responses to guiding questions over an assigned reading, completion of a comparison contrast matrix). Formative assignments are graded for accuracy and descriptive feedback is provided. Formative work may be at the student’s instructional level or at the level of the content standard. Formative assessments/assignments will have all levels of learning – Basic (2), Proficient (3), and Advanced (4), which means that for every formative assessment/assignment, students will be able to earn an Advanced (4). Teachers will require students to redo work that is not of high quality to ensure rigor and high expectations. The students score on a formative assessment that was redone will be their final score.

- **Summative (65% of the final grade)** – assessments/assignments are major end of learning unit tests or projects used to determine mastery of content or skill (e.g., a research paper, an oral report with a power point, major unit test, and science fair project). Summative assignments are graded for accuracy. Summative assignments assess the student’s progress on grade level standards and may not be written at the student’s instructional level. Summative assessments/assignments will have all levels of learning – Basic (2), Proficient (3), and Advanced (4), which means that for every formative assessment/assignment students, will be able to earn an advanced(4).

To maintain alignment of coursework to content standards, which is a key best practice for standards-based grading, teachers will utilize a standardized naming convention for each of the standards within a course. The content standard will be marked on each
assignment entered into Infinite Campus (District Grading Program) using all capital letters followed by a colon. After the colon will be the title of the coursework.

At the end of the grading period, scores are converted to a letter grade using this grading scale.

\[
\begin{align*}
A &= 3.26 - 4.00 \\
B &= 2.51 - 3.25 \\
C &= 1.76 - 2.50 \\
D &= 1.01 - 1.75 \\
F &= 0.00 - 1.00
\end{align*}
\]

Redoing/Revising Student Coursework*

1. Students are responsible for completing all coursework and assessments as assigned.
2. Students will be allowed redos and revisions of coursework for full credit as long as they are turned in during that unit of study while a student still has an opportunity to benefit from the learning. When time permits, teachers should allow the redoing or revising of summative assessments.
3. Students are expected to complete assessments when given to the class, or if a student was justifiably absent, at a time designated by the teacher.
4. Redoing, retaking or revising will be done at teacher discretion in consultation with the student and parent(s). Teachers may schedule students before, during, or after school to address needed areas of improvement if not convenient during class. The time and location for redoing, retaking or revising will be done at the teacher's discretion in consultation with the student and parent(s).
5. Scores for student work after retaking, revising or redoing will not be averaged with the first attempt at coursework but will replace the original score.
